### What's an ISBN?

The International Standard Book Number (ISBN) is a unique identifier used for commercial books. It is much like a UPC code you find on products in supermarkets.

You can usually find this code in the back of your textbook.

## Publish Your Book

- Obtain an LCCN Number
  - Pre-assigned Control Number (PCN) - <http://pcn.loc.gov/>
  - Don't forget to mail them a copy of your book once printed.

The purpose of the Preassigned Control Number (PCN) program is to enable the Library of Congress to assign control numbers in advance of publication to those titles that may be added to the Library's collections. The publisher prints the control number in the book and thereby facilitates cataloging and other book processing activities. The PCN links the book to any record which the Library of Congress, other libraries, bibliographic utilities, or book vendors may create.

## Publish Your Book

- Set the Price for Your Book

  - Keep within price range of similar books.
  - Take into account discounts required by stores and distributors.
  - Pricing a book too high or too low causes sales to suffer.

## Publish Your Book

- Set the Price for Your Book
  - eBooks are priced lower than print books.
  - Sweet spot pricing for fiction ebooks is between \$2.99 and \$4.99.

## Publish Your Book

- Copyright Your Book

  - Cost is \$35 or \$55 for online registration
